Volume 36: Subject index

Abbreviations:—"(L)" refers to letters to the Editor.

A23187, platelet aggregation to, defective, in patient with lifelong bleeding disorder, **1140**
Achalasia and measles virus, association between, preliminary report of, **655**
Acid naphthyl acetate esterase, cytoplasmic, cytochemistry of, in myeloid leukaemia, comparison with cell membrane Fc-IgG and C3b receptors, **555**
Acinetobacter anitratus, gliding motility of (L), **484**
Acridine orange staining for early detection of positive blood cultures, comparison with subculture and Gram staining, **595**
Adenocarcinoma of jejunum and in situ squamous carcinoma of oesophagus in coeliac disease, case of, **62**
Adenoma, pleomorphic, parotid, in Vietnamese boat person, tyrosine crystals in (L), **237**
Adenosine triphosphate, somatic, in urine specimens, destruction of, reduced incubation period for, **482**
Aeromonas hydrophila, faecal carriage rate of, **920**
Aerosols, bacterial, in mortuaries, **127**
Albumin/cholesterol ratio, total, as alternative to high density lipoprotein cholesterol measurement, **716**
Alcohol, clinical pathology of, **365**
—— excess, chronic, association with selective but reversible injury to type 2B muscle fibres, **772**
Alcoholic cirrhosis, immune complex nephritis in, and detection of Mallory body antigen in complexes with monoclonal antibodies, **751**
—— liver disease and mesangial IgA deposits, kidneys of patients with, elution of antibodies to Mallory's hyaline from (L), **1416**
—— —— ——, hepatocytes from patients with, detection of immunoglobulins G and A on cell membrane of, **530**
—— —— ——, liver membrane antibodies to ethanol-altered hepatocytes in, **1302**
—— —— ——, serum antibodies to hepatitis B virus in (L), **116**
—— skeletal muscle myopathy, chronic, clinical, histological and biochemical assessment of muscle lipid in, **778**
Alcoholics, blood platelet changes during alcohol withdrawal in, **337**
Alkaline denaturation of haemoglobin in maternal and fetal blood, differential effect of Triton X-100 and other detergents, **910**
Alkaline phosphatase, lactase and sucrase activity, small intestinal, in relation to age, sex and site of intestinal biopsy in 477 Irish subjects, **74**
Aluminium, bone histochemical staining reactions for, in chronic renal failure patients treated with haemodialysis fluids, **1281**
——, renal osteodystrophy related to, avascular necrosis of femoral head in, and role of endochondral ossification in repair, **260**
—— storage in bone marrow in renal failure, **1288**
Ames Seralyzer. *See* Seralyzer
Amiodarone and desethylamiodarone, high-performance liquid chromatographic measurement in small tissue samples after enzymatic digestion, **785**
Ammonium chloride treatment, effect on human polymorphonuclear leucocyte iodination, **808**
Amniotic fluid embolism, diagnosis of, use of antiserum to human keratin in, **625**
Amoebal enrichment of clinical specimens for isolation of *Legionella pneumophila*, and interaction between isolates and host amoebae, **978**
Ampicillin, sensitivity to, associated with resistance to Augmentin, occurrence and explanation of, **670**
Amyloid A protein and C-reactive protein, serum concentrations in cancer and non-malignant disease, comparison of, **798**
—— microdeposits in sclerocalcific heart valves, histochemical and immunofluorescence study of, **1342**
Anaemia, sickle cell, iron deficiency in, **1012**
Anaerobes, non-sporing, recovery from simulated blood cultures, effect of addition of papain ox liver digest (Panmede) to brain heart infusion cysteine broth, **678**
Anaerobic blood cultures, **968**
Anaerobiospirillum species isolated from humans with diarrhoea, **1097**
Angiofollicular lymph node hyperplasia of hyaline-vascular type with systemic manifestations and response to corticosteroids, **1005**
Angiosarcoma developing around foreign body from old war would, case of, **515**
Angiotensin I-converting enzyme activity, clinical significance of, review of, **938**
—— —— ——, tripeptidylcarboxypeptidase activity in serum (L), **835**
Antibiotics, minimum bactericidal concentrations of, semi-automated determination of, **208**
——, sensitivity of dental plaque to, and prophylaxis for infective endocarditis, **459**
——, sensitivity testing of *H influenzae* in UK laboratories, accuracy of methods used, **1105**
Antibodies, antinuclear, systemic lupus erythematosus lacking, incidence of (L), **1084**
——, IgG, specific, to *Chlamydia trachomatis*, immunoperoxidase assay for detection of, **353**
——, liver membrane, to ethanol-altered hepatocytes in alcoholic liver disease, **1302**
——, monoclonal and heterologous, in analysis of large-cell lymphomas, **44**
——, ——, antiaxonal and antimyelin, in morphological study of perineural spread by squamous carcinomas of head and neck, **269**
——, ——, immunocytochemical staining with, in cytologically 'negative' serous effusions from patients with malignant disease, **1150**
——, ——, in study of distribution of transferrin receptors in human tissues, **539**; (L), **1414**; (L), **1415**
——, ——, panel of, in immunocytochemical staining of cells in pleural and peritoneal effusions, **1154**
——, synthesis within CNS, detection of, comparison of CSF IgG indices and electrophoresis for, **312**
—— to hepatitis B virus in serum in alcoholic liver disease (L), **116**
—— to *Legionella pneumophila*, detection of, ELISA test for, variability in EIA plates used in (L), **238**
—— —— —— —— serogroups 1 to 6 and Leiden-1 strain, detection by ELISA and indirect immunofluorescence assay compared, **1246**
—— to *M. pneumoniae*, detection of, comparison of ELISA and complement fixation test for, **228**
—— to Mallory bodies, elution from kidneys of patients with alcoholic liver disease and mesangial IgA deposts (L), **1416**
—— to rubella, direct haemolysis-in-gel test for, use in Icelandic prevention programme for congenital rubella, **1253**
—— to *Toxoplasma gondii*, detection of, modified Toxoreagent latex test for, **361**
Antibody, hepatitis Be, detection by ELISA, field trial of, **581**
——, monoclonal (R4/23), reactive with dendritic reticulum cells, production and use in immunohistological analysis of lymphoid tissue, **167**

—— to hepatitis B core antigen, value of screening blood donors for, **924**
Antigen, epithelial membrane, quantification of, in cytological screening of cervical neoplasms, with semi-automated procedure, **535**
——, gonococcal, detection with solid phase enzyme immunoassay (Gonozyme™) in diagnosis of urogenital gonorrhoea, **674**
——, hepatitis B core, antibody to, value of screening blood donors for, **924**
——, hepatitis Be, detection by ELISA, field trial of, **581**
Antigens, bacterial, in cerebrospinal fluid, detection of, comparison of Phadebact coagglutination tests with counterimmunoelectrophoresis for, **819**; (L), **1321**
——, blood group, in normal and neoplastic bladder epithelium, **873**
Antimicrobial susceptibility tests and Enterobacteriaceae identification, evaluation of automated reading of microtitre plates in, **341**
Antinuclear antibodies, systemic lupus erythematosus lacking, incidence of (L), **1084**
Antisera, monoclonal, staining of splenic sinusoids and demonstration of banded structures by, **1176**
Antiserum immunoreactivity, assessment by ELISA in endocrine immunocytochemical studies, **406**
—— to human keratin in diagnosis of amniotic fluid embolism, **625**
Antithrombin III activity and lipoprotein concentrations, preoperative, as predictors of venous thrombosis in fracture of neck of femur, **570**
—— —— in systemic lupus erythematosus, relation to clinical and serological parameters, **357**
Antrum, gastric, intramucosal carcinoma of, complicating Menetrier's disease, case of, **1071**
API 10S biotyping of Haemophilus for epidemiological tracing, **96**; *Erratum*, **364**
Appendix, vermiform, granulomatous (Crohn's) disease in, **632**
Arthritis, rheumatoid, serum copper as marker of disease activity in, **14**
Arthropathy, ochronotic, calcium pyrophosphate dihydrate deposition in case of, **894**
Aspirates and trephine biopsies, bilateral sampling with, in detection of bone marrow invasion by neuroblastoma, **1215**
Aspiration biopsy, fine needle, of thyroid gland, study of 304 cases, **1036**
——, bone marrow, inherent sampling errors overcome with new needle in, **954**
Association of Clinical Pathologists Research Award, **1206**
Augmentin, resistance to, associated with sensitivity to ampicillin, occurrence and explanation of, **670**

Bacillus cereus infections, non-gastrointestinal, analysis of exotoxin production by strains isolated over 2-year period, **1091**
Bacteraemia, blood culture for, clinical significance of, **964**
——, detection by automated blood culture system (L), **1412**
——, diagnosis from blood cultures, rapid methods for, **973**
Bacteria and fungi, killing effect of ozone, microbiological testing with domestic ozone generator, **1102**
——, growth in blood culture, early detection by Bactometer model 32 impedance monitoring, **823**
——, —— under strict anaerobic conditions, device for continuous opacity monitoring of, **1229**
——, pathogenic, demonstration in 'sterile' inflammatory exudates, **454**
Bacterial aerosols in mortuaries, **127**
—— antigens in cerebrospinal fluid, detection of, comparison of Phadebact coagglutination tests with counterimmunoelectrophoresis for, **819**; (L), **1321**
—— flora of cervix, quantification of (L), **1412**
Bactericidal concentrations of antibiotics, minimum, semi-automated determination of, **208**
Bacteriogenic shock, **974**
Bacteriology, use of Phoenix system for, **104**
Bacteriuria, detection of, mechanised batch screening method for, **1318**
—— in patients undergoing prostatectomy (L), **1320**; (L), **1321**
Bactometer model 32 impedance monitoring for early detection of bacterial growth in blood culture, **823**
Bile acids, conjugated and unconjugated, serum concentrations, measurement using 3α-hydroxysteroid dehydrogenase, **235**; *Erratum*, **610**
——, *Clostridium perfringens* and other anaerobes isolated from, **345**
Bilirubin, cholesterol and creatinine measurement in serum and plasma by Seralyzer solid-phase reflectance spectroscopy, **598**
Biopsy, aspiration, fine needle, of thyroid gland, study of 304 cases, **1036**
'Birefringence' and 'optical activity', confusion of terms (L), **1202**
Bladder epithelium, normal and neoplastic, blood group antigens in, **873**
Bleeding disorder, lifelong, defective platelet aggregation to A23187 in patient with, **1140**
Blood culture, anaerobic, **968**
—— ——, bacterial growth in, early detection by Bactometer model 32 impedance monitoring, **823**
—— ——, contamination in, **967**
—— ——, conventional techniques, **970**
—— ——, current state and future prospects *(Symposium report)*, **963**
—— —— for bacteraemia, clinical significance of, **964**
—— —— —— ——, rapid methods for, **973**
—— —— system, automated, for detection of bacteraemia (L), **1412**
—— ——, value to clinician, **965**
—— cultures, positive, early detection of, comparative study of subculture, Gram staining and acridine orange staining, **595**
—— ——, simulated, recovery of non-sporing anaerobes from, effect of addition of papain ox liver digest (Panmede) to brain heart infusion cysteine broth, **678**
—— donor screening for antibody to hepatitis B core antigen, value of, **924**
—— fibronectin concentration, estimates of, influence of sample preparation, **233**
—— glucose monitors, quality assessment of use outside hospital laboratory, **948**
—— group antigens in normal and neoplastic bladder epithelium, **873**
—— haemoglobin, maternal and fetal, alkaline denaturation of, differential effect of Triton X-100 and other detergents, **910**
——, leucocyte depletion of, new filter for, evaluation of, **1200**
——, peripheral, for prediction of bone marrow relapse of acute lymphoblastic leukaemia in childhood, comparison with buffy coat smear, **192**
—— platelet(s). *See* Platelet(s)
—— products, fibronectin in, *in vitro* and *in vivo* study, **1377**
Bone histomorphometric analysis in familial hypocalciuric hypercalcaemia (L), **1319**
——, histomorphometry of, review of, **1323**
—— histoquantitative findings and histochemical staining reactions for aluminium in chronic renal failure patients treated with haemodialysis fluids, **1281**
—— marrow aluminium storage in renal failure, **1288**
—— —— aspiration, inherent sampling errors overcome with new needle in, **954**
—— —— cellularity in diagnosis of polycythaemia, **180**; (L), **836**
—— —— fragments, cellularity in, assessment of, **176**; (L), **835**
—— —— invasion by neuroblastoma, detection by bilateral sampling with aspirates and trephine biopsies, **1215**
—— —— relapse of acute lymphoblastic leukaemia in childhood, comparison of peripheral blood and buffy coat smear for prediction of, **192**
—— —— transplantation, allogeneic, for treatment of leukaemia, current status and techniques, **1207**
—— —— —— for treatment of leukaemia, current status and techniques, **1207**
—— —— ——, infection problems after, **683**
—— —— ——, lung histopathology after, **546**
—— marrows, sideroblastic, pyridoxal and pyridoxal phosphate in patients with, use of fluorimetric method for measurement in

plasma and leucocytes, **701**
——, mineralised, plastic embedding of, technique for, **1197**

Bouin's fluid, use for colposcopic biopsies of cervix with multicompartment containers and dental wax rafts, **1317**
Bowel. *See* Intestine(s)
Brain heart infusion cysteine broth, addition of papain ox liver digest (Panmede) to, effect on recovery of non-sporing anaerobes from simulated blood cultures, **678**
Breast, carcinoma of, histopathological systems of classification, reproducibility and clinical significance of, **392**; (L), **1084**
——, —— ——, oestrogen receptor assay of cryostat sections with simultaneous quantitative histology, **399**
Buffy coat smear for prediction of bone marrow relapse of acute lymphoblastic leukaemia in childhood, comparison with peripheral blood, **192**

C3b and Fc-IgG membrane receptors on myeloid leukaemia cells, comparison with cytoplasmic acid naphthyl acetate esterase cytochemistry, **555**
Calcium ionophores. *See* A23187
Calcium pyrophosphate dihydrate deposition in case of ochronotic arthropathy, **894**
—— —— —— —— in intervertebral discs in case of Wilson's disease, **764**
Campylobacter jejuni, cytotoxin from, demonstration of, **1237**
—— —— isolation from faeces, enrichment culture necessary for?, **1350**
—— ——, —— from various body sites, attempts at, **667**
—— *jejuni/coli*, isolation of, comparison of selective media for, **78**
Campylobacters, thermophilic, oxygen and carbon dioxide requirements of, **829**
Carbon dioxide and oxygen requirements of thermophilic campylobacters, **829**
Carcinoma and non-malignant disease, comparison of serum amyloid A protein and C-reactive protein concentrations in, **798**
—— and other conditions, urinary cyclic nucleotides in (L), **116**
——, cervical, screening of hospital patients for, **611**
——, colorectal, polyamines in, clinical and experimental approach, **508**
—— ——, relative carriage rates of nuclear dehydrogenating clostridia in two populations differing in risk of, **93**
——, follicular, of thyroid, factor VIII as marker of endothelial cells in, **1050**
——, gastric and colonic, modified tetrazolium reaction for identification of malignant cells from, **133**
——, ——, cells of, pepsinogen in, **137**
——, ——, haemolytic-uraemic syndrome complicating long-term mitomycin C and 5-fluorouracil therapy for, **24**
——, hepatocellular, complicating chronic granulomatous hepatitis, case of, **1062**
——, histological grading of, observer variation in (L), **1083**
——, intramucosal, of gastric antrum complicating Menetrier's disease, case of, **1071**
——, nasopharyngeal, diagnosis with epithelial cell markers, immunocytochemical study, **628**
—— of breast, histopathological systems of classification, reproducibility and clinical significance of, **392**; (L), **1084**
—— —— ——, oestrogen receptor assay of cryostat sections with simultaneous quantitative histology, **399**
——, rectal, histological grading of, observer variation in, **385**; (L), **1083**; (L), **1084**
——, renal, secreting inactive renin, ultrastructural and immunocytochemical study, **639**
——, squamous, of head and neck, perineural spread by, morphological study with antiaxonal and antimyelin monoclonal antibodies, **269**
——, ——, of oesophagus, and adenocarcinoma of jejunum, in coeliac disease, case of, **62**
——. *See also* Malignant disease
Cellular infiltrate, inflammatory, in duodenitis, nature of, **280**
Cellulose acetate electrophoresis with immunofixation for detection of oligoclonal bands in unconcentrated CSF, comparison with polyacrylamide gel electrophoresis, **1309**
Central nervous system. *See* Nervous system, central
Cerebrospinal fluid, bacterial antigens in, detection of, comparison of Phadebact coagglutination tests with counterimmunoelectrophoresis for, **819**; (L), **1321**
—— —— concentrations of hypoxanthine, xanthine, uridine and inosine after hypoxia, **1**
—— —— IgG indices for detection of antibody synthesis within CNS, comparison with electrophoresis, **312**
—— ——, leukaemia/lymphoma cells in (L), **606**
—— —— shunts, removed, bacteriological examination of, comparison of conventional with new method, **987**
—— ——, unconcentrated, detection of oligoclonal bands in, comparison of cellulose acetate immunofixation and polyacrylamide gel electrophoresis for, **1309**
Cervical cancer, screening of hospital patients for, **611**
—— neoplasms, cytological screening by quantification of EMA, with semi-automated procedure, **535**
—— region, upper, trauma in, subarachnoid haemorrhage due to, **1335**
Cervix, biopsies, colposcopic, use of Bouin's fluid, multicompartment containers and dental wax rafts for, **1317**
——, microbial flora of, quantification of (L), **1412**
——, papilloma virus infection of, histopathology of, and koilocytic dysplasias, **616**
Charcoal, protein-coated, limitations for separation of free from bound vitamin B_{12} in serum, **1022**
Chemotaxis, neutrophil, impairment by serum from patients with chronic lymphoproliferative disease, **449**
Chlamydia trachomatis, specific IgG antibodies to, immunoperoxidase assay for detection of, **353**
Chlorate poisoning, increased erythrocyte membrane rigidity in (L), **719**
Cholangitis, sclerosing, primary, longstanding, case of, **1298**
Cholesterol, bilirubin and creatinine measurement in serum and plasma by Seralyzer solid-phase reflectance spectroscopy, **598**
Cholesterol/albumin ratio, total, as alternative to high density lipoprotein cholesterol measurement, **716**
Chromatography, gas-liquid, as screening test for toxigenic *C difficile* in diarrhoeal stools, **1233**
Chromogenic substrate endotoxin assay for clinical use, **1145**
Cirrhosis, alcoholic, immune complex nephritis in, and detection of Mallory body antigen in complexes with monoclonal antibodies, **751**
Clostridia, nuclear dehydrogenating, relative carriage rates in two populations of different colorectal cancer risk, **93**
Clostridium difficile infection, household pets as potential reservoir for, **84**
—— ——, isolation from hospital patients, and role of ward environment in spread of infection, **88**
—— ——, toxigenic, in diarrhoeal stools, gas-liquid chromatography as screening test for, **1233**
—— *perfringens* and other anaerobes isolated from bile, **345**
Coagglutination tests, Phadebact, for detection of bacterial antigens in cerebrospinal fluid, comparison with counterimmunoelectrophoresis, **819**; (L), **1321**
Cocci, anaerobic, selective agent for (L), **605**
Coeliac disease, adenocarcinoma of jejunum and in situ squamous carcinoma of oesophagus in, case of, **62**
—— ——, adult, raised 5-hydroxytryptamine concentrations in enterochromaffin cells in, **499**
Colitis, pseudomembranous, associated with changes in ileal con-

duit, **1184**
——, ulcerative, and Crohn's disease, enzymic markers of inflammation in rectal biopsies in, biochemical analysis of, **1312**
Collagen stimulating factors, isolation from healing wounds, **707**
——, type III, and fibronectin in epithelial neoplasms of gastrointestinal tract and salivary gland, **756**
Colonic cancer and gastric cancer, modified tetrazolium reaction for identification of malignant cells from, **133**
Colorectal cancer, polyamines in, clinical and experimental approach, **508**
—— ——, relative carriage rates of nuclear dehydrogenating clostridia in two populations differing in risk of, **93**
Colposcopic biopsies of cervix, use of Bouin's fluid, multicompartment containers and dental wax rafts for, **1317**
Complement activation, nephelometric technique for measurement of, clinical application of, **793**
—— fixation, detection by ELISA, **100**
—— —— test for detection of *Mycoplasma pneumoniae* antibodies, comparison with ELISA, **228**
——. *See also* C3b
Computer programs in cytology reporting and record keeping, **856**
Contamination, environmental, in use of equipment for ELISA microtitre plates, assessment of, **110**
—— in blood culture, **967**
—— of specimen container surfaces during sputum collection, **479**
Contraceptives, oral, effect of, and comparison of haematological indices between women of four ethnic groups, **184**
——, ——, —— on zinc and copper concentrations in leucocytes and erythrocytes in healthy adults, **1016**
Copper in serum as marker of disease activity in rheumatoid arthritis, **14**
Copper-associated protein demonstrated by orcein staining, value in diagnostic assessment of liver biopsy, **18**
Coronary angiography, postmortem, revitalisation with new technique, **1406**
—— care unit patients, Coxsackie B virus infection in, **658**
Corrections, **244, 364, 610, 722, 962**
Corticosteroids (prednisolone), response to, in angiofollicular lymph node hyperplasia of hyaline-vascular type with systemic manifestations, **1005**
Counterimmunoelectrophoresis for detection of bacterial antigens in cerebrospinal fluid, comparison with Phadebact coagglutination tests, **819**; (L), **1321**
—— in serodiagnosis of Legionnaires' disease, **466**
Coxsackie B virus infection in coronary care unit patients, **658**
C-reactive protein and amyloid A protein, serum concentrations in cancer and non-malignant disease, comparison of, **798**
Creatine kinase and lactate dehydrogenase, measurement by Seralyzer systems using reflectance spectroscopy and reagent strips, **1371**
—— —— isoenzyme demonstration method, staining modification of (L), **837**
Creatinine, bilirubin and cholesterol measurement in serum and plasma by Seralyzer solid-phase reflectance spectroscopy, **598**
Crohn's disease and ulcerative colitis, enzymic markers of inflammation in rectal biopsies in, biochemical analysis of, **1312**
—— —— of vermiform appendix, **632**
Cryoprecipitate, freeze dried, for home therapy in haemophilia, clinical evaluation of, **574**; (L), **1321**; (L), **1322**
Cryostat section, use in electron microscopy, **903**
Cyclosporin A, stability in human serum samples, **41**; (L), **720**
Cystic fibrosis patients and heterozygotes, β cell reserve in, **790**
Cystitis, 'abacterial', due to urethral *E. coli?*, **224**
Cytogenetic studies in paediatric necropsies, **140**
Cytology reporting and record keeping, computer programs in, **856**
Cytoplasmic acid naphthyl acetate esterase cytochemistry in myeloid leukaemia, comparison with cell membrane Fc-IgG and C3b receptors, **555**

Data processing system adapted for emergency laboratory, **847**
Dental plaque, antibiotic sensitivity of, and prophylaxis for infective endocarditis, **459**
Desethylamiodarone and amiodarone, high-performance liquid chromatographic measurement in small tissue samples after enzymatic digestion, **785**
Detergents (Triton X-100 and others), differential effect on alkaline denaturation of haemoglobin in maternal and fetal blood, **910**
Diabetic ketoacidosis, raised Coulter mean corpuscular volume in, and association with plasma hyperosmolarity, **334**
Diabetics dependent on insulin, low pancreatic lipase in, **200**
Diarrhoea, *Anaerobiospirillum* species isolated from humans with, **1097**
Diarrhoeal stools, toxigenic *C difficile* in, gas-liquid chromatography as screening test for, **1233**
Duodenitis, inflammatory cell infiltrate in, nature of, **280**
Dysplasias, koilocytic, and histopathology of papilloma virus infection of cervix uteri, **616**

Electron microscopy, use of cryostat section in, **903**
Electrophoresis, cellulose acetate (with immunofixation) and polyacrylamide gel, for detection of oligoclonal bands in unconcentrated CSF, comparison of, **1309**
—— for detection of antibody synthesis within CNS, comparison with CSF IgG indices, **312**
ELISA for assessment of antiserum immunoreactivity in endocrine immunocytochemical studies, **406**
—— for detection of antibodies to *L pneumophila* serogroups 1 to 6 and Leiden-1 strain, comparison with indirect immunofluorescence assay, **1246**
—— —— —— of antibodies to *L pneumophila*, variability in EIA plates used in (L), **238**
—— —— —— of hepatitis Be antigen and antibody, field trial of, **581**
—— —— —— of *Mycoplasma pneumoniae* antibodies, comparison with complement fixation test, **228**
—— in detection of complement fixation, **100**
—— in detection of hepatitis A IgM, report of joint DMQC/Organon field trial, **1111**
—— microtitre plates, equipment for, assessment of environmental contamination in use of, **110**
Embolism, amniotic fluid, diagnosis of, use of antiserum to human keratin in, **625**
EMIT for gentamicin, performance on Kem-O-Mat and role in small laboratory, evaluation of, **1241**
Endocarditis, infective, prophylaxis for, and antibiotic sensitivity of dental plaque, **459**
Endothelial cells in follicular carcinoma of thyroid, factor VIII as marker of, **1050**
Endotoxin, chromogenic substrate assay for clinical use, **1145**
Enterobacteriaceae identification and antimicrobial susceptibility tests, evaluation of automated reading of microtitre plates in, **341**
Enterochromaffin cells, 5-hydroxytryptamine in, raised concentrations in adult coeliac disease, **499**
Enteropathy, gluten- and non-gluten-induced, distinction by proliferative response of small intestinal epithelial lymphocytes, **149**
Enzyme immunoassay, solid phase (Gonozyme™) in detection of gonococcal antigen for diagnosis of urogenital gonorrhoea, **674**
—— multiplied immunoassay technique. *See* EMIT
Enzyme-linked immunosorbent assay. *See* ELISA
Enzymic markers of inflammation in rectal biopsies in ulcerative colitis and Crohn's disease, biochemical analysis of, **1312**
Epithelial cell markers in diagnosis of nasopharyngeal carcinoma, immunocytochemical study, **628**
—— lymphocytes, small intestinal, proliferative response and distinction of gluten- from non-gluten-induced enteropathy, **149**
—— membrane antigen, quantification of, in cytological screening of cervical neoplasms, with semi-automated procedure, **535**
Erythrocytes and leucocytes, zinc and copper concentrations in healthy adults, and effect of oral contraceptives, **1016**
—— containing haemoglobin C, resistance to lysis in differential white cell counting system (Technicon H6000), **816**
——, deformability, effect of reconstructive vascular surgery, **1136**
——, identification of cryptantigens and classification of polyagglutinability, 'new' lectins for (from *Medicago disciformis* and

Medicago turbinata), **195**
——, increased membrane rigidity in chlorate poisoning (L), **719**
——, sorbitol dehydrogenase activity, fluorimetric method for, **697**
——, superoxide dismutase activity, increase in β^o-thalassaemia/Hb E and Hb H diseases, **329**
——. *See also* Red cell
Escherichia coli in or near urethra, cause of 'abacterial' cystitis?, **224**
Esterase staining in monocytes (L), **236**
Ethanol, hepatocytes altered by, liver membrane antibodies to, in alcoholic liver diseae, **1302**
——, selective atrophy of type 2B muscle fibres in rats fed on (L), **1415**

Factor VIII as marker of endothelial cells in follicular carcinoma of thyroid, **1050**
Factor VIII-related antigen/von Willebrand protein, multimeric structure of, analysis with modified electrophoretic technique, **915**
Faecal carriage rate of *Aeromonas hydrophila*, **920**
Faeces, *Campylobacter jejuni* isolation from, enrichment culture necessary for?, **1350**
Fat malabsorption, assessment of, **1362**
Fatty acids, non-volatile, in diagnosis of non-specific vaginitis, **1367**
Fc-IgG and C3b membrane receptors on myeloid leukaemia cells, comparison with cytoplasmic acid naphthyl acetate esterase cytochemistry, **555**
Femoral head, avascular necrosis of, in aluminium-related renal osteodystrophy, and role of endochondral ossification in repair, **260**
Femur, neck of, fracture of, venous thrombosis in, preoperative antithrombin III activity and lipoprotein concentrations as predictors of, **570**
Ferritin in liver, immunoradiometric assay (using rivanol) for, **440**
Fetus, iron transfer to, increase after total dose infusion of iron dextran during pregnancy, **907**
Fibroblast transplantation treatment of mucopolysaccharidoses, biochemical and histopathological studies, **415**
Fibronectin and type III collagen in epithelial neoplasms of gastrointestinal tract and salivary gland, **756**
—— concentration in blood, estimates of, influence of sample preparation, **233**
—— in blood products, *in vitro* and *in vivo* study, **1377**
Filaments, intermediate (vimentin and desmin), in smooth muscle tumours, **57**
Fluorimetric method for measurement of pyridoxal and pyridoxal phosphate in plasma and leucocytes and use in patients with sideroblastic marrows, **701**
—— —— —— —— of red blood cell sorbital dehydrogenase activity, **697**
5-Fluorouracil and mitomycin C therapy, long-term, for gastric carcinoma, haemolytic-uraemic syndrome complicating, **24**
Follicles, lymphoid, benign and malignant, size of, quantitative study of, **1055**
Food-starch granulomatous peritonitis, **435**
Foreign body from old war wound, angiosarcoma developing around, case of, **515**
Formaldehyde in pathology departments, toxic effects and containment measures, **839**
Fungi and bacteria, killing effect of ozone, microbiological testing with domestic ozone generator, **1102**

Gardnerella vaginalis isolated from vagina, minimal criteria for identification of, **476**
Gas-liquid chromatography as screening test for toxigenic *C difficile* in diarrhoeal stools, **1233**
Gastric cancer and colonic cancer, modified tetrazolium reaction for identification of malignant cells from, **133**
—— —— cells, pepsinogen in, **137**
—— ——, haemolytic-uraemic syndrome complicating long-term mitomycin C and 5-fluorouracil therapy for, **24**
Gastrointestinal lymphoma, Middle Eastern, morphological and immunohistochemical study, **489**
—— tract and salivary gland epithelial neoplasms, fibronectin and type III collagen in, **756**
Gentamicin EMIT, performance on Kem-O-Mat and role in small laboratory, evaluation of, **1241**
Giant cell tumour of pancreas, osteoclast-type, case of, **1165**
—— —— —— —— ——, ——, —— —— (epithelial tumour of acinar origin?), **1171**
Glomerulus, renal, study of full cross-sections of, electron microscopy method for, **1081**
Glucagonoma, metastatic, in recurrent insulinoma syndrome, case of, **1076**
Glucose, blood, monitors of, quality assessment of use outside hospital laboratory, **948**
——, uric acid and urea estimation by Ames Seralyzer system of reflectance spectroscopy, evaluation of, **9**
Gluten-sensitive enteropathy, distinction from non-gluten-induced enteropathy by proliferative response of small intestinal epithelial lymphocytes, **149**
Glycogenosis, type III, presenting as liver disease in 2 adults with atypical histology, **431**
Gonococcal antigen detection with solid phase enzyme immunoassay (Gonozyme^{TM}) in diagnosis of urogenital gonorrhoea, **674**
Gonorrhoea, rectal, in men, histology of, with note on anorectal infection with *Neisseria meningitidis*, **511**
——, urogenital, diagnosis by detection of gonococcal antigen with solid phase enzyme immunoassay (Gonozyme^{TM}), **674**
Gonozyme^{TM} in detection of gonococcal antigen for diagnosis of urogenital gonorrhoea, **674**
Gram staining for early detection of positive blood cultures, comparison with subculture and acridine orange staining, **595**
Granulocytes, microbicidal function of, comparison of effects of filtration leucapheresis and discontinuous flow centrifugation leucapheresis, **586**
Granulomata, necrotising, in prostatic resection specimens as sequel to previous operation, **1067**
Granulomatous (Crohn's) disease in vermiform appendix, **632**
—— hepatitis, chronic, hepatocellular carcinoma complicating, case of, **1062**
—— inflammation, review of, **723**
—— mastitis, lobular, postpartum (L), **363**
—— peritonitis associated with food starch, **435**
Growth hormone and malignancy, **935**
Guinea-pig inoculation for diagnosis of tuberculosis, justification for? (L), **719**

Haematological features of primary myelodysplastic syndromes at initial presentation, study of 118 cases, **1129**
—— indices, comparison between women of four ethnic groups, and effect of oral contraceptives, **184**
Haematoxylin basic fuchsin picric acid method for identification of early myocardial infarction, comparison with fluorescence of haematoxylin and eosin staining, **646**
—— counterstaining of immunofluorescence preparations, **114**
Haemopdialysis fluids, chronic renal failure patients treated with, bone histoquantitative findings and histochemical staining reactions for aluminium in, **1281**
Haemoglobin C, erythrocytes containing, resistance to lysis in differential white cell counting system (Technicon 6000), **816**
—— H disease and β^o-thalassaemia/Hb E disease, increased erythrocyte superoxide dismutase activity in, **329**
—— in maternal and fetal blood, alkaline denaturation of, differential effect of Triton X-100 and other detergents, **910**
Haemolysis-in-gel test, direct, for rubella antibodies, use in Icelandic prevention programme for congenital rubella, **1253**
Haemolytic-uraemic syndrome complicating long-term mitomycin C and 5-fluorouracil therapy for gastric carcinoma, **24**
Haemophilia A, incidence of hepatitis B virus infection in 56 patients with (1971–79), **577**
——, freeze dried cryoprecipitate for home therapy in, clinical evaluation of, **574**; (L), **1321**; (L), **1322**
Haemophilus, biotyping with API 10S for epidemiological tracing, **96**; *Erratum*, **364**
—— species, recognition of (L), **721**

Haemophilus influenzae, antibiotic susceptibility testing in UK laboratories, accuracy of methods used, **1105**
—— ——, laboratory identification of, evaluation of tests for, **991**
Haemorrhage, subarachnoid, due to upper cervical trauma, **1335**
Head and neck, squamous carcinomas of, perineural spread by, morphological study with antiaxonal and antimyelin monoclonal antibodies, **269**
Heart valves, sclerocalcific, amyloid microdeposits in, histochemical and immunofluorescence study of, **1342**
Hepatic. *See* Liver
Hepatitis A IgM detection by ELISA, report of joint DMRQC/Organon field trial, **1111**
—— —— virus infection, liver histopathology of, comparison with hepatitis types B and non-A, non-B, **650**
—— B core antigen, antibody to, value of screening blood donors for, **924**
—— —— virus infection, incidence in 56 patients with haemophilia A (1971–79), **577**
—— —— ——, serum antibodies to, in alcoholic liver disease (L), **116**
—— Be antigen and antibody detection by ELISA, field trial of, **581**
Hepatocellular carcinoma complicating chronic granulomatous hepatitis, case of, **1062**
Hepatocytes from patients with alcoholic liver disease, detection of immunoglobulins G and A on cell membrane of, **530**
Herpes simplex virus infection, disseminated, with misleading clinical presentation (L), **115**
—— —— ——, typing and subtyping of, miniaturised and simplified technique for, **929**
Histiocytes, HLA-DR-positive, in intestinal lamina propria, heterogeneity of, histochemical-immunohistological analysis of, **379**
Histological diagnosis, repeatability and validity of, measurement of, and evaluation of kappa statistic, **1269**
Histopathology, quality assurance and medical audit in (L), **1202**
—— reporting of mastectomy specimens, assessment of inter-hospital variation in, **1276**
HLA-DR-positive histiocytes in intestinal lamina propria, heterogeneity of, histochemical-immunohistological analysis of, **379**
HLA-DR$^+$ cells in normal kidney, heterogeneity of, and immunohistological and cytochemical characterisation of discrete populations, **734**
Hospital patients, screening for uterine cervical cancer, **611**
—— ward environment, role in spread of *Clostridium difficile* among patients, **88**
Howie code, differentiation from Howie report (L), **606**
—— —— for laboratory safety, cost-effectiveness of (L), **363**; (L), **958, 959**; (L), **1417**
Human embryo kidney cells and fibroblast cells, comparison of continuous cell line 293 with, for cultivation of ocular viruses, **996**
3α-Hydroxysteroid dehydrogenase method for measurement of conjugated and unconjugated serum bile acids, **235**; *Erratum*, **610**
5-Hydroxytryptamine in enterochromaffin cells, raised concentrations in adult coeliac disease, **499**
Hypercalcaemia, hypocalciuric, familial, bone histomorphometric analysis in (L), **1319**
Hypertension, portal, reversible, and liver damage from vitamin A intoxication and demonstration of Ito cells, **769**
Hyperviscosity and pseudohyponatraemia (L), **834**
Hypocalciuric hypercalcaemia, familial, bone histomorphometric analysis in (L), **1319**
Hypothermia and pancreatitis (L), **483**
Hypothyroid myopathy, muscle morphology and metabolism in, and effects of treatment, **519**
Hypoxanthine, xanthine, uridine and inosine, CSF concentrations after hypoxia, **1**

Ileal conduit, changes in, pseudomembranous colitis associated with, **1184**
Image analysis of secretory granule area in small intestine for assessment of Paneth cell population changes, **867**
Immune complex nephritis in alcoholic cirrhosis and detection of Mallory body antigen in complexes with monoclonal antibodies, **751**
Immunocytochemical staining of cells in pleural and peritoneal effusions with panel of monoclonal antibodies, **1154**
—— —— with monoclonal antibodies in cytologically 'negative' serous effusions from patients with malignant disease, **1150**
Immunofluorescence assay, indirect, in detection of antibodies to *L pneumophila* serogroups 1 to 6 and Leiden-1 strain, comparison with ELISA, **1246**
—— in grouping and detection of group B streptococci, **463**
—— preparations, haematoxylin counterstaining of, **114**
Immunoglobulin A, mesangial deposits of, and alcoholic liver disease, kidneys of patients with, elution of antibodies to Mallory's hyaline from (L), **1416**
—— —— pyroglobulinaemia in lymphoma, case of (L), **1084**
—— G antibodies, specific, to *Chlamydia trachomatis*, immunoperoxidase assay for detection of, **353**
—— —— in CSF, indices of, for detection of antibody synthesis within CNS, comparison with electrophoresis, **312**
—— ——. *See also* Fc-IgG
—— M antibody to hepatitis A, detection by ELISA, report of joint DMRQC/Organon field trial, **1111**
Immunoglobulins A and M, mesangial deposits of, occurrence in control necropsy population, **276**
——, cellular, in chronic lymphocytic leukaemia, identification by immunoperoxidase staining, **1391**
—— G and A, detection on cell membrane of hepatocytes from patients with alcoholic liver disease, **530**
—— in B cell non-Hodgkin's lymphomas, light chain monotypia in, demonstration with unfixed freeze-dried and formalin-fixed trypsinised paraffin sections, **883**
——, serum concentrations in preschool children measured by laser nephelometry, with reference ranges for IgG, IgA, IgM, **1193**
——, surface membrane, in paraffin sections of non-Hodgkin's lymphomas, staining with immunogold-silver technique, **742**
Immunogold-silver technique in staining of surface membrane immunoglobulins in paraffin sections of non-Hodgkin's lymphomas, **742**
Immunoperoxidase assay for detection of specific IgG antibodies to *Chlamydia trachomatis*, **353**
—— staining in identification of cellular immunoglobulins in chronic lymphocytic leukaemia, **1391**
—— techniques, inhibitory effect of sodium azide on peroxidase conjugate activity in, **411**; (L), **1201**
Impedance monitoring with Bactometer model 32 for early detection of bacterial growth in blood culture, **823**
Infant death syndrome, sudden, hepatic lipid in, biochemical and histological assessment of, **1188**
Infection, mean platelet volume changes in (L), **1320**
—— problems after bone marrow transplantation, **683**
Infections in British clinical laboratories (1980–81), **121**
Inflammation, granulomatous, review of, **723**
Inflammatory cell infiltrate in duodenitis, nature of, **280**
—— exudates, 'sterile', demonstration of pathogenic bacteria in, **454**
Insulin, diabetics dependent on, low pancreatic lipase in, **200**
Insulinoma syndrome, recurrent, with metastatic glucagonoma, case of, **1076**
Intervertebral discs, calcium pyrophosphate dihydrate deposition in case of Wilson's disease in, **764**
Intestinal lymphangiectasia associated with macroglobulinaemia, 2 cases of, **30**
Intestine, small, epithelial lymphocytes, proliferative response and distinction of gluten- from non-gluten-induced enteropathy, **149**
——, ——, lactase, sucrase and alkaline phosphatase activity in relation to age, sex and site of intestinal biopsy in 477 Irish subjects, **74**
——, ——, Paneth cell population of, changes assessed by image analysis of secretory granule area, **867**
Intestines, inflammatory disease of, chronic, stable, no evidence for prethrombotic state in, **1387**

——, lamina propria of, HLA-DR-positive histiocytes in, heterogeneity of, histochemical-immunohistological analysis of, **379**
Intramucosal carcinoma of gastric antrum complicating Menetrier's disease, case of, **1071**
Iron deficiency in sickle cell anaemia, **1012**
—— transfer to fetus, increase after total dose infusion of iron dextran during pregnancy, **907**
Ito cells, demonstration in liver damage with reversible portal hypertension from vitamin A intoxication, **769**

Jejunum, adenocarcinoma of, and in situ squamous carcinoma of oesophagus, in coeliac disease, case of, **62**

Kappa statistic for measurement of repeatability and validity of histological diagnosis, evaluation of, **1269**
Kem-O-Mat, performance of gentamicin EMIT on, evaluation of, **1241**
Keratin, human, antiserum to, in diagnosis of amniotic fluid embolism, **625**
Ketoacidosis, diabetic, raised Coulter mean corpuscular volume in, and association with plasma hyperosmolarity, **334**
Kidneys, normal, HLA-DR+ cells in, heterogeneity of, and immunohistological and cytochemical characterisation of discrete populations, **734**
—— of patients with alcoholic liver disease and mesangial deposits, elution of antibodies to Mallory's hyaline from (L), **1416**
——. *See also* Renal
Kirchner medium, selective, in culture of non-sputum specimens for mycobacteria, **1357**
Koilocytic dysplasias, and histopathology of papilloma virus infection of cervix uteri, **616**

Laboratories, clinical, British, infections in (1980–81), **121**
Laboratory, clinical, costing in, benefits of, **1028**
——, emergency, data processing system adapted for, **847**
—— safety, Howie code for, cost-effectiveness of (L), **363**; (L), **958, 959**; (L), **1417**
Lactase, sucrase and alkaline phosphatase activity, small intestinal, in relation to age, sex and site of intestinal biopsy in 477 Irish subjects, **74**
Lactate dehydrogenase and creatine kinase, measurement by Seralyzer systems using reflectance spectroscopy and reagent strips, **1371**
Lactoferrin deficiency in neutrophil polymorphonuclear leucocytes in leukaemias, semiquantitative and ultrastructural cytochemical study, **1397**
Langerhans cells, increase in dermal lesions of adult T cell leukaemia in Japan, **307**
Laser nephelometry, serum immunoglobulin concentrations in preschool children measured by, with reference ranges for IgG, IgA, IgM, **1193**
Lectin binding to formalin-fixed paraffin sections, **747**
Lectins, 'new' (from *Medicago disciformis* and *Medicago turbinata*), for identification of erythrocyte cryptantigens and classification of erythrocyte polyagglutinability, **195**
Legionella pneumophila, antibodies to, detection of, ELISA test for, variability in EIA plates used in (L), **238**
—— ——, isolation from clinical specimens by amoebal enrichment, and interaction between isolates and host amoebae, **978**
—— —— serogroups 1 to 6 and Leiden-1 strain, antibodies to, detection by ELISA and indirect immunofluorescence assay compared, **1246**
Legionnaires' disease, serodiagnosis of, counterimmunoelectrophoresis in, **466**
Leishmania parasites, internal birefringence as aid to recognition (L), **604**
Leucapheresis, filtration and discontinuous flow centrifugation, comparison of effects on granulocyte microbicidal function, **586**
Leucocyte depletion of blood, new filter for, evaluation of, **1200**
—— differential counting system (Technicon 6000), resistance of erythrocytes containing haemoglobin C to lysis in, **816**
Leucocytes and erythrocytes, zinc and copper concentrations in healthy adults, and effect of oral contraceptives, **1016**
—— and plasma, pyridoxal and pyridoxal phosphate in, fluorimetric method for measurement of, and use in patients with sideroblastic marrows, **701**
——, contamination by, effect on *in vitro* storage of platelet concentrates in new plastics (PL-732 and CLX), **1382**
——, polymorphonuclear, human, iodination response of, effect of ammonium chloride treatment, **808**
——, ——, neutrophil, lactoferrin-deficient, in leukaemias, semiquantitative and ultrastructural cytochemical study, **1397**
Leukaemia, adult, lysosomal enzyme abnormalities in various forms of, correlation of, **1000**
——, allogeneic bone marrow transplantation for treatment of, current status and techniques, **1207**
——, lymphoblastic, acute, in childhood, bone marrow relapse of, comparison of peripheral blood and buffy coat smear for predication of, **192**
——, lymphocytic, chronic, cellular immunoglobulins in, identification by immunoperoxidase staining, **1391**
——, ——, ——, impaired production of mononuclear cell procoagulant activity in, **37**
——, monocytic, acute, lymphoma-like presentation of, 4 cases of, **559**
——, myeloid, cell membrane Fc-IgG and C3b receptors, comparison with cytoplasmic acid naphthyl acetate esterase cytochemistry, **555**
——, neutrophilic, chronic, with enlarged lymph nodes and lysozyme deficiency, case of, **324**
——, T cell, adult, Langerhans cell increase in dermal lesions of, in Japan, **307**
Leukaemia/lymphoma cells in CSF (L), **606**
Leukaemias, lactoferrin-deficient neutrophil polymorphonuclear leucocytes in, semiquantitative and ultrastructural cytochemical study, **1397**
Lipase, pancreatic, low, in insulin-dependent diabetics, **200**
Lipids, hepatic, in sudden infant death syndrome, biochemical and histological assessment of, **1188**
——, muscle, in chronic alcoholic skeletal muscle myopathy, clinical, histological and biochemical assessment of, **778**
Lipoprotein concentrations and antithrombin III activity, preoperative, as predictors of venous thrombosis in fracture of neck of femur, **570**
——, high density, cholesterol measurement, total cholesterol/albumin ratio as alternative to, **716**
Liquid chromatography, high-performance, in measurement of amiodarone and desethylamiodarone in small tissue samples after enzymatic digestion, **785**
Liver biopsy, diagnostic assessment of, value of orcein staining and demonstration of copper-associated protein in, **18**
—— damage with reversible portal hypertension from vitamin A intoxication and demonstration of Ito cells, **769**
—— disease, alcoholic, and mesangial IgA deposits, kidneys of patients with, elution of antibodies to Mallory's hyaline from (L), **1416**
—— ——, ——, hepatocytes from patients with, detection of immunoglobulins G and A on cell membrane of, **530**
—— ——, ——, liver membrane antibodies to ethanol-altered hepatocytes in, **1302**
—— ——, type III glycogenosis in 2 adults with atypical histology presenting as, **431**
—— ferritin, immunoradiometric assay (using rivanol) for, **440**
—— histopathology of hepatitis A virus infection, comparison with hepatitis types B and non-A, non-B, **650**
——, lipids, in sudden infant death syndrome, biochemical and histological assessment of, **1188**
——, nodules of, necrotic, solitary, simulating hepatic metastases, **1181**
Lung histopathology after bone marrow transplantation, **546**
Lupus erythematosus, systemic, antinuclear antibody-negative, incidence of (L), **1084**
—— ——, ——, pancytopenia in, myelofibrosis as cause of, **1219**
—— ——, ——, relation between antithrombin III and clinical and

serological parameters in, **357**
Lymph nodes, enlargement of, and lysozyme deficiency in chronic neutrophilic leukaemia, case of, **324**
—— ——, hyperplasia, angiofollicular, of hyaline-vascular type with systemic manifestations and response to corticosteroids, **1005**
—— ——, reactive, and non-Hodgkin's lymphomas, form factor of α-naphthyl acetate esterase-positive cells in, **303**
—— ——, ——, —— —— ——, nuclear form factor, area and diameter in, **298**; *Erratum*, **962**
Lymphangiectasia, intestinal, associated with macroglobulinaemia, 2 cases of, **30**
Lymphoblastic leukaemia, acute, in childhood, bone marrow relapse of, comparison of peripheral blood and buffy coat smear for prediction of, **192**
Lymphocytes, epithelial, small intestinal, proliferative response and distinction of gluten- from non-gluten-induced enteropathy, **149**
——, migration into diseased tissues, possible route for, **161**
Lymphocytic leukaemia, chronic, cellular immunoglobulins in, identification by immunoperoxidase staining, **1391**
—— ——, ——, impaired production of mononuclear cell procoagulant activity in, **37**
Lymphoid follicles, benign and malignant, nuclear sizes in centres of, **1332**
—— ——, —— —— ——, size of, quantitative study of, **1055**
—— tissue, immunohistological analysis with monoclonal antibody (R4/23) reactive with dendritic reticulum cells, **167**
Lymphoma, acute monocytic leukaemia initially misinterpreted as, 4 cases of, **559**
——, gastrointestinal, Middle Eastern, morphological and immunohistochemical study, **489**
——, IgA pyroglobulinaemia in, case of (L), **1084**
——, large-cell, analysis with monoclonal and heterologous antibodies, **44**
——, non-Hodgkin's, and reactive lymph nodes, form factor of α-naphthyl acetate esterase-positive cells in, **303**
——, ——, —— —— —— ——, nuclear form factor, area and diameter in, **298**; *Erratum*, **962**
——, ——, B cell, light chain monotypia in, demonstration with unfixed freeze-dried and formalin-fixed trypsinised paraffin sections, **883**
——, ——, —— ——, morphometric characterisation of 52 cases, **289**
——, ——, surface membrane immunoglobulins in paraffin sections of, staining with immunogold-silver technique, **742**
Lymphoma/leukaemia cells in CSF (L), **606**
Lymphoproliferative disease, chronic, impairment of neutrophil chemotaxis by serum from patients with, **449**
Lysosomal enzyme abnormalities in various forms of adult leukaemia, correlation of, **1000**
Lysozyme deficiency and enlarged lymph nodes in chronic neutrophilic leukaemia, case of, **324**

Macroglobulinaemia associated with intestinal lymphagiectasia, 2 cases of, **30**
Macrophages in malignant disease, disordered function of, **316**
Malignancy and growth hormone, **935**
Malignant disease, disordered function of mononuclear phagocytes in, **316**
—— ——, immunocytochemical staining with monoclonal antibodies in cytologically 'negative' serous effusions from patients with, **1150**
Mallory bodies, antibodies to, elution from kidneys of patients with alcoholic liver disease and mesangial IgA deposits (L), **1416**
—— body antigen, detection in immune complexes with monoclonal antibodies and immune complex nephritis in alcoholic cirrhosis, **751**
Malondialdehyde-like material (MDA-LM) in serum in acute myocardial infarction, **712**
Marrow. *See* Bone marrow
Mastectomy specimens, histopathology reporting of, assessment of inter-hospital variation in, **1276**
Mastitis, granulomatous, lobular, postpartum (L), **363**
Measles virus and achalasia, association between, preliminary report of, **655**
Meconium ileus equivalent, pathology of case of, **1297**
Medical audit and quality assurance in histopathology (L), **1202**
Megakaryocytes and platelets, thrombospondin in, immunohistochemical localisation of, **197**
Melanoma, malignant, cutaneous, prognostic value of tumour thickness in, **51**; *Erratum*, **364**
Melphalan, multiple myeloma resistant to, plasma spermidine concentrations as early indication of response to therapy in, **804**
Menetrier's disease, intramucosal carcinoma of gastric antrum complicating, case of, **1071**
Mesangial IgA and IgM deposits, occurrence in control necropsy population, **276**
—— —— deposits and alcoholic liver disease, kidneys of patients with, elution of antibodies to Mallory's hyaline from (L), **1416**
Mesenchymoma of stomach, benign, **504**
Metastases, hepatic, solitary necrotic nodules of liver simulating, **1181**
Methotrexate measurement in biological fluids, microbiological assay for, **1116**
Microbiological safety tests (L), **117**
α_1-Microglobulin as indicator protein for renal tubular function, **253**
Microtitre plates, automated reading of, evaluation in antimicrobial susceptibility tests and Enterobacteriaceae identification, **341**
Mitomycin C and 5-fluorouracil therapy, long-term, for gastric carcinoma, haemolytic-uraemic syndrome complicating, **24**
Monoclonal and heterologous antibodies in analysis of large-cell lymphomas, **44**
—— antibodies, antiaxonal and antimyelin, in morphological study of perineural spread by squamous carcinomas of head and neck, **269**
—— ——, immunocytochemical staining with, in cytologically 'negative' serous effusions from patients with malignant disease, **1150**
—— —— in study of distribution of transferrin receptors in human tissues, **539**; (L), **1414**; (L), **1415**
—— ——, panel of, in immunocytochemical staining of cells in pleural and peritoneal effusions, **1154**
—— antibody (R4/23) reactive with dendritic reticulum cells, production and use in immunohistological analysis of lymphoid tissue, **167**
—— antisera, staining of splenic sinusoids and demonstration of banded structures by, **1176**
Monocytes, esterase staining in (L), **236**
Monocytic leukaemia, acute, lymphoma-like presentation of, 4 cases of, **559**
Mononuclear cells, procoagulant activity of, impaired production in chronic lymphocytic leukaemia, **37**
Mortuaries, bacterial aerosols in, **127**
Mucopolysaccharidoses, biochemical and histopathological studies of 5 cases, 2 treated by fibroblast transplantation, **415**
——, screening method for (L), **363**
'Mucosal prolapse syndrome', proposed grouping of solitary ulcer syndrome and rectal mucosal prolapse as, **1264**
Muscle fibres, type 2B, selective atrophy of, in ethanol-fed rats (L), **1415**
—— ——, —— ——, —— but reversible injury to, association with chronic alcohol excess, **772**
—— morphology and metabolism in hypothyroid myopathy and effects of treatment, **519**
Mycobacteria, culture of non-sputum specimens for, selective Kirchner medium in, **1357**
Mycoplasma pneumoniae antibodies, detection of, comparison of ELISA and complement fixation test for, **228**
Myelodysplastic disorders, defective neutrophil function and microbicidal mechanisms in, **1120**
—— syndrome with myelofibrosis, platelet peroxidase deficiency in case of, **1223**
—— syndromes, primary, haematological features at initial presentation, study of 118 cases, **1129**
—— ——, ——, prevalence and distribution of ringed sideroblasts

in, **566**; (L), **1413**; (L), **1414**
Myelofibrosis as cause of pancytopenia in systemic lupus erythematosus, **1219**
——, myelodysplastic syndrome with, platelet peroxidase deficiency in case of, **1223**
Myeloid leukaemia, cell membrane Fc-IgG and C3b receptors, comparison with cytoplasmic acid naphthyl acetate esterase cytochemistry, **555**
Myeloma, multiple, melphalan-resistant, plasma spermidine concentrations as early indication of response to therapy in, **804**
Myocardial infarction, acute, serum malondialdehyde-like material (MDA-LM) in, **712**
—— ——, early, identification of, comparison of haematoxylin basic fuchsin picric acid method and fluorescence of haematoxylin and eosin staining, **646**
Myopathy, hypothyroid, muscle morphology and metabolism in, and effects of treatment, **519**
——, skeletal muscle, alcoholic, chronic, clinical, histological and biochemical assessment of muscle lipid in, **778**

α-Naphthyl acetate esterase-positive cells in non-Hodgkin's lymphomas and reactive lymph nodes, form factor of, **303**
Nasopharyngeal carcinoma, diagnosis with epithelial cell markers, immunocytochemical study, **628**
Neck and head, squamous carcinomas of, perineural spread by, morphological study with antiaxonal and antimyelin monoclonal antibodies, **269**
Necropsies, paediatric, cytogenetic studies in, **140**
——, potentially hazardous, flexible plastic film isolators for, **527**
Necrosis, avascular, of femoral head in aluminium-related renal osteodystrophy, and role of endochondral ossification in repair, **260**
Neisseria, commensal species of, pathogenic potential of, **213**
Neisseria meningitidis infection, anorectal, in men, note on, **511**
Neoplasms, cervical, cytological screening by quantification of EMA, with semi-automated procedure, **535**
——, epithelial, of gastrointestinal tract and salivary gland, fibronectin and type III collagen in, **756**
Neoplastic bladder epithelium, blood group antigens in, **873**
Nephelometric technique for measurement of complement activation, clinical application of, **793**
Nephelometry, laser, serum immunoglobulin concentrations in preschool children measured by, with reference ranges for IgG, IgA, IgM, **1193**
Nephritis, immune complex, in alcoholic cirrhosis and detection of Mallory body antigen in complexes with monoclonal antibodies, **751**
Nervous system, central, antibody synthesis within, detection of, comparison of CSF IgG indices and electrophoresis for, **312**
Neuroblastoma, bone marrow invasion by, detection by bilateral sampling with aspirates and trephine biopsies, **1215**
—— in mature cystic teratoma of ovary, case of, **68**
Neutrophil chemotaxis, impairment by serum from patients with chronic lymphoproliferative disease, **449**
—— polymorphonuclear leucocytes, lactoferrin-deficient, in leukaemias, semiquantitative and ultrastructural cytochemical study, **1397**
Neutrophils, function and microbicidal mechanisms, defective, in myelodysplastic disorders, **1120**
Notices, **120, 244, 364, 488, 838, 962, 1086, 1206, 1322, 1417**
Nuclear form factor, area and diameter in non-Hodgkin's lymphomas and reactive lymph nodes, **298**; *Erratum*, **962**
—— sizes in centres of malignant and benign lymphoid follicles, **1332**
Nucleotides, cyclic, urinary, in cancer and other conditions (L), **116**

Ochronotic arthropathy, calcium pyrophosphate dihydrate deposition in case of, **894**
Ocular viruses, cultivation of, comparison of continuous cell line 293 with human embryo kidney cells and fibroblast cells for, **996**
Oesophagus, carcinoma of, squamous, and adenocarcinoma of jejunum, in coeliac disease, case of, **62**
Oestrogen receptor assay of cryostat sections of breast carcinomas with simultaneous quantitative histology, **399**
'Optical activity' and 'birefringence', confusion of terms (L), **1202**
Orcein staining and demonstration of copper-associated protein, value in diagnostic assessment of liver biopsy, **18**
Osteoclast-type giant cell tumour of pancreas, case of, **1165**
—— —— —— —— —— ——, —— —— (epithelial tumour of acinar origin?), **1171**
Osteodystrophy, renal, aluminium-related, avascular necrosis of femoral head in, and role of endochondral ossification in repair, **260**
Osteomalacia and osteoporosis, diagnostic and discriminant index for, **245**
Ovary, teratoma of, cystic, mature, neuroblastoma in, case of, **68**
Oxygen and carbon dioxide requirements of thermophilic campylobacters, **829**
Ozone, bactericidal and fungicidal action, microbiological testing with domestic ozone generator, **1102**

Paediatric necropsies, cytogenetic studies in, **140**
Pancreas, tumour of giant cell, osteoclast-type, case of, **1165**
——, —— ——, —— ——, ——, —— —— (epithelial tumour of acinar origin?), **1171**
Pancreatic β cell reserve in cystic fibrosis patients and heterozygotes, **790**
—— lipase, low, in insulin-dependent diabetics, **200**
Pancretitis and hypothermia (L), **483**
Pancytopenia in systemic lupus erythematosus, myelofibrosis as cause of, **1219**
Paneth cell population of small intestine, changes assessed by image analysis of secretory granule area, **867**
Papain ox liver digest (Panmede), addition to brain heart infusion cysteine broth, effect on recovery of non-sporing anaerobes from simulated blood cultures, **678**
Papilloma virus infection of cervix uteri, histopathology of, and koilocytic dysplasias, **616**
Parathyroid disease, nuclear diameter in, **143**
Parotid pleomorphic adenoma in Vietnamese boat person, tyrosine crystals in (L), **237**
Parvovirus-like virus in serum, aplastic crisis in hereditary spherocytosis due to?, **445**
Pasteurella multocida, selective medium for, and use with animal and human specimens, **591**
Pathology departments, formaldehyde in, toxic effects and containment measures, **839**
Pencillin tolerance in streptococci, detection of, **1353**
Pepsinogen in gastric carcinoma cells, **137**
Perineural spread by squamous carcinomas of head and neck, morphological study with antiaxonal and antimyelin monoclonal antibodies, **269**
Peritoneal and pleural effusions, cells in, immunocytochemical staining with panel of monoclonal antibodies, **1154**
Peritonitis, granulomatous, associated with food starch, **435**
Peroxidase conjugate activity in immunoperoxidase techniques, inhibitory effect of sodium azide, **411**; (L), **1201**
—— deficiency of platelets in case of myelodysplastic syndrome with myelofibrosis, **1223**
Pets, household, as potential reservoir for *Clostridium difficile* infection, **84**
Phadebact coagglutination tests for detection of bacterial antigens in cerebrospinal fluid, comparison with counterimmunoelectrophoresis, **819**; (L), **1321**
Phagocytes, mononuclear. *See* Macrophages
Phoenix system, use for bacteriology, **104**
Pigment production, detection and identification of group B streptococci by, **350**
Plasma and leucocytes, pyridoxal and pyridoxal phosphate in, fluorimetric method for measurement of, and use in patients with sideroblastic marrows, **701**
Plasminogen activators in vein vessel wall, immunological characterisation of, **1046**
Platelet aggregation to A23187, defective, in patient with lifelong bleeding disorder, **1140**

—— changes in alcoholics during alcohol withdrawal, **337**
—— concentrates, *in vitro* storage of, effect of new plastics (PL-732 and CLX) and leucocyte contamination, **1382**
—— ——, preparation, *in vitro* storage and cryopreservation of, β-thromboglobulin release during, **811**
—— peroxidase deficiency in case of myelodysplastic syndrome with myelofibrosis, **1223**
—— storage, comparison of PL 146, CLX and Biotest 733822 Plastics for (L), **1202**
—— volume, mean, changes in infection (L), **1320**
—— ——, ——, increase in septicaemia, **693**
Platelets and megakaryocytes, thrombospondin in, immunohistochemical localisation of, **197**
Pleural and peritoneal effusions, cells in, immunocytochemical staining with panel of monoclonal antibodies, **1154**
Polyacrylamide gel electrophoresis for detection of oligoclonal bands in unconcentrated CSF, comparison with cellulose acetate immunofixation, **1309**
Polyamines in colorectal cancer, clinical and experimental approach, **508**
Polyarthritis, epidemic. *See* Ross River virus infection
Polycythaemia, diagnosis of, marrow cellularity in, **180**; (L), **836**
Portal hypertension, reversible, and liver damage from vitamin A intoxication and demonstration of Ito cells, **769**
Pregnancy, increased iron transfer to fetus after total dose infusion of iron dextran during, **907**
Procoagulant activity of mononuclear cells, impaired production in chronic lymphocytic leukaemia, **37**
Prostatectomy, bacteriuria in patients undergoing (L), **1320**; (L), **1321**
Prostatic resection specimens, necrotising granulomata in, as sequel to previous operation, **1067**
Proteins, acute phase, response to trauma, early time course of, **203**
Pseudohyponatraemia and hyperviscosity (L), **834**
Pseudomembranous colitis associated with changes in ileal conduit, **1184**
Pyridoxal and pyridoxal phosphate, fluorimetric method for measurement in plasma and leucocytes and use in patients with sideroblastic marrows, **701**
Pyroglobulinaemia, IgA, in lymphoma, case of (L), **1084**

Quality assurance and medical audit in histopathology (L), **1202**

Radioimmunoassay, PVC trays used in, hot-wire cutting aid for, **1410**
Rectal carcinoma, histological grading of, observer variation in, **385**; (L), **1083**; (L), **1084**
—— gonorrhoea in men, histology of, with note on anorectal infection with *Neisseria meningitidis*, **511**
Rectum, biopsies in ulcerative colitis and Crohn's disease, enzymic markers of inflammation in, biochemical analysis of, **1312**
——, solitary ulcer syndrome, and rectal mucosal prolapse, comparison and proposed grouping as 'mucosal prolapse syndrome', **1264**
Red cell volume, mean, Coulter, increase in diabetic ketoacidosis, and association with plasma hyperosmolarity, **334**
—— ——. *See also* Erythrocytes
Reflectance spectroscopy and reagent strips, Seralyzer systems using, in measurement of lactate dehydrogenase and creatine kinase, **1371**
—— ——, solid-phase, with Seralyzer in measurement of serum and plasma bilirubin, cholesterol and creatinine, **598**
—— —— using Seralyzer for estimation of uric acid, urea and glucose, evaluation of, **9**
Renal carcinoma secreting inactive renin, ultrastructural and immunocytochemical study, **639**
—— failure, bone marrow aluminium storage in, **1288**
—— ——, chronic, bone histoquantitative findings and histochemical staining reactions for aluminium in patients treated with haemodialysis fluids, **1281**
—— glomerulus, study of full cross-sections of, electron microscopy method for, **1081**
—— osteodystrophy, aluminium-related, avascular necrosis of femoral head in, and role of endochondral ossification in repair, **260**
—— tubular function, α_1-microglobulin as indicator protein for, **253**
Renin, inactive, renal carcinoma secreting, ultrastructural and immunocytochemical study, **639**
Reticulohistiocytosis, multicentric, synovium and synovial fluid in case of, light microscopic, electron microscopic and cytochemical analysis, **860**
Reticulum cells, dendritic, monoclonal antibody (R4/23) reactive with, production and use in immunohistological analysis of lymphoid tissue, **167**
Rheumatoid arthritis, serum copper as marker of disease activity in, **14**
Ross River virus infection (epidemic polyarthritis), exanthem of, histology, location of virus antigen and nature of inflammatory infiltrate, **1256**
Rubella antibodies, direct haemolysis-in-gel test for, use in Icelandic prevention programme for congenital rubella, **1253**

Safety, laboratory, Howie code for, cost-effectiveness of (L), **363**; (L), **958, 959**; (L), **1417**
—— tests, microbiological (L), **117**
Salivary gland and gastrointestinal tract epithelial neoplasms, fibronectin and type III collagen in, **756**
Sclerocalcific heart valves, amyloid microdeposits in, histochemical and immunofluorescence study of, **1342**
Septicaemia, increased mean platelet volume in, **693**
Seralyzer solid-phase reflectance spectroscopy in measurement of serum and plasma bilirubin, cholesterol and creatinine, **598**
—— system of reflectance spectroscopy for estimation of uric acid, urea and glucose, evaluation of, **9**
—— systems using reflectance spectroscopy and reagent strips in measurement of lactate dehydrogenase and creatine kinase, **1371**
Serous effusions, cytologically 'negative', from patients with malignant disease, immunocytochemical staining with monoclonal antibodies in, **1150**
Serum and plasma bilirubin, cholesterol and creatinine measurement by Seralyzer solid-phase reflectance spectroscopy, **598**
—— antibodies to hepatitis B virus in alcoholic liver disease (L), **116**
—— bile acids, conjugated and unconjugated, measurement using 3 α-hydroxysteroid dehydrogenase, **235**; *Erratum*, **610**
—— copper as marker of disease activity in rheumatoid arthritis, **14**
—— from patients with chronic lymphoproliferative disease, impairment of neutrophil chemotaxis by, **449**
—— immunoglobulin concentrations in preschool children measured by laser nephelometry, with reference ranges for IgG, IgA, IgM, **1193**
—— malondialdehyde-like material (MDA-LM) in acute myocardial infarction, **712**
—— parvovirus-like virus, aplastic crisis of hereditary spherocytosis due to?, **445**
—— samples, human, stability of cyclosporin A in, **41**; (L), **720**
——, separation of free from bound vitamin B_{12} in, limitations of protein-bound charcoal for, **1022**
Shock, bacteriogenic, **974**
Sickle cell anaemia, iron deficiency in, **1012**
Sideroblastic marrows, pyridoxal and pyridoxal phosphate in patients with, use of fluorimetric method for measurement in plasma and leucocytes, **701**
Sideroblasts, ringed, prevalence and distribution in primary myelodysplastic syndromes, **566**; (L), **1413**; (L), **1414**
Sinusoids, splenic, staining and demonstration of banded structures by monoclonal antisera, **1176**
Skeletal muscle myopathy, alcoholic, chronic, clinical, histological and biochemical assessment of muscle lipid in, **778**
Smooth muscle tumours, intermediate filaments (vimentin and desmin) in, **57**
Sodium azide, inhibitory effect on peroxidase conjugate activity in

immunoperoxidase techniques, **411**; (L), **1201**
Somatic ATP in urine specimens, destruction of, reduced incubation period for, **482**
Sorbitol dehydrogenase activity in red blood cells, fluorimetric method for, **697**
Spectroscopy, reflectance, and reagent strips, Seralyzer systems using, in measurement of lactate dehydrogenase and creatine kinase, **1371**
——, ——, solid-phase, with Seralyzer in measurement of serum and plasma bilirubin, cholesterol and creatinine, **598**
——, ——, using Seralyzer for estimation of uric acid, urea and glucose, evaluation of, **9**
Spermidine, plasma concentrations, as early indication of response to therapy in melphalan-resistant multiple myeloma, **804**
Spherocytosis, hereditary, aplastic crisis of, due to single agent (e.g. serum parvovirus-like virus)?, **445**
Spinal tuberculosis, examination of operation specimens for tubercle bacilli in, **662**
Splenic sinusoids, staining and demonstration of banded structures by monoclonal antisera, **1176**
Sputum collection, contamination of specimen container surfaces during, **479**
Squamous carcinomas of head and neck, perineural spread by, morphological study with antiaxonal and antimyelin monoclonal antibodies, **269**
—— —— of oesophagus and adenocarcinoma of jejunum in coeliac disease, case of, **62**
Staphylococci, trimethoprim susceptibility to (L), **722**
Starch from foodstuffs, granulomatous peritonitis associated with, **435**
Stomach, mesenchymoma of, benign, **504**
Streptococci, group B, detection and identification by pigment production, **350**
——, —— ——, grouping and detection by immunofluorescence, **463**
——, penicillin tolerance in, detection of, **1353**
Subarachnoid haemorrhage due to upper cervical trauma, **1335**
Sucrase, lactase and alkaline phosphatase activity, small intestinal, in relation to age, sex and site of intestinal biopsy in 477 Irish subjects, **74**
Superoxide dismutase activity in erythrocytes, increase in β^{o}-thalassaemia/Hb E and Hb H disease, **329**
Synovium and synovial fluid in case of multicentric reticulohistiocytosis, light microscopic, electron microscopic and cytochemical analysis, **860**

T cell leukaemia, adult, Langerhans cell increase in dermal lesions of, in Japan, **307**
Teratoma, cystic, mature, of ovary, neuroblastoma in, case of, **68**
Tetrazolium reaction, modified, for identification of malignant cells from gastric and colonic cancer, **133**
β^{o}-Thalassaemia/Hb E disease and Hb H disease, increased erythrocyte superoxide dismutase activity in, **329**
Thromboembolic disease, predisposition to, in stable chronic inflammatory bowel disease, no evidence for, **1387**
β-Thromboglobulin release during preparation, *in vitro* storage and cryopreservation of platelet concentrates, **811**
Thrombosis, venous, in fracture of neck of femur, preoperative antithrombin III activity and lipoprotein cencentrations as predictors of, **570**
Thrombospondin in megakaryocytes and platelets, immunohistochemical localisation of, **197**
Thyroid gland, fine needle aspiration biopsy of, study of 304 cases, **1036**
—— ——, follicular carcinoma of, factor VIII as marker of endothelial cells in, **1050**
Toxoplasma gondii, antibodies to, detection of, modified Toxoreagent latex test for, **361**
—— ——, purification from host cells, **602**
Transferrin receptors in human tissues, distribution studied with monoclonal antibodies and possible clinical relevance, **539**; (L), **1414**; (L), **1415**
Transplantation of bone marrow, allogeneic, for treatment of leukaemia, current status and techniques, **1207**
—— —— —— ——, infection problems after, **683**
—— —— —— ——, lung histopathology after, **546**
Trauma, acute phase protein response to, early time course of, **203**
Trephine biopsies and aspirates, bilateral sampling with, in detection of bone marrow invasion by neuroblastoma, **1215**
Trimethoprim susceptibility to staphylococci (L), **722**
Tripeptidylcarboxypeptidase activity of angiotension I converting enzyme in serum (L), **835**
Tuberculosis, epidemiological trends in, physician's view of, **1087**
——, guinea-pig inoculation for diagnosis of, justification for? (L), **719**
——, incidence of, and Howie code for laboratory safety (L), **363**; (L), **958, 959**
——, spinal, examination of operation specimens for tubercle bacilli in, **662**
Tumour, of pancreas, giant cell, osteoclast-type, case of, **1165**
—— —— ——, —— ——, ——, —— —— (epithelial tumour of acinar origin?), **1171**
Tumours, smooth muscle, intermediate filaments (vimentin and desmin) in, **57**
Typhoid fever diagnosis in endemic area, significance and value of Widal test in, **471**
Tyrosine crystals in parotid pleomorphic adenoma in Vietnamese boat person (L), **237**

Urea, uric acid and glucose estimation by Seralyzer system of reflectance spectroscopy, evaluation of, **9**
Urethra, *E. coli* in or near, cause of 'abacterial' cystitis?, **224**
Uric acid, urea and glucose estimation by Seralyzer system of reflectance spectroscopy, evaluation of, **9**
Urinary cyclic nucleotides in cancer and other conditions (L), **116**
Urine specimens, somatic ATP in, destruction of, reduced incubation period for, **482**
Urogenital gonorrhoea, diagnosis by detection of gonococcal antigen with solid phase enzyme immunoassay (Gonozyme™), **674**
Uterine cervical cancer. *See* Cervical cancer

Vagina, *Gardnerella vaginalis* isolated from, minimal criteria for identification of, **476**
Vaginitis, non-specific, diagnosis of, non-volatile fatty acids in, **1367**
Vascular surgery, reconstructive, effect on red cell deformability, **1136**
Vein vessel wall, plasminogen activators in, immunological characterisation of, **1046**
Venous thrombosis in fracture of neck of femur, preoperative antithrombin III activity and lipoprotein concentrations as predictors of, **570**
Viruses, ocular, cultivation of, comparison of continuous cell line 293 with human embryo kidney cells and fibroblast cells for, **996**
Vitamin A intoxication, liver damage with reversible portal hypertension from, and demonstration of Ito cells, **769**
—— B_{12}, free and bound, in serum, separation of, limitations of protein-coated charcoal for, **1022**

White cell(s). *See* Leucocyte(s)
Widal test, significance and value in diagnosis of typhoid fever in endemic area, **471**
Wilson's disease, calcium pyrophosphate dihydrate deposition in intervertebral discs in case of, **764**
Wounds, healing, isolation of collagen stimulating factors from, **707**

Xanthine, hypoxanthine, uridine and inosine, CSF concentrations after hypoxia, **1**

Zinc and copper concentrations in leucocytes and erythrocytes in healthy adults and effect of oral contraceptives, **1016**
